POWER

GENERAL INDEX TO VOLUME LXXVII

January—December, 1933

January	Pages	1-56
February	"	57-110
March	"	111-166
April	"	167-220
May	"	221-282
June	"	283-336
July	"	337-392
August	"	393-446
September	"	447-502
October	"	503-556
November	"	557-612
December	"	613-666
Mid December	"	667-726

A

ACCIDENTS AND ACCIDENT PREVENTION — Page

Furnace doors used for explosion relief. L. R. Baker ... 649
H. M. Spring ... 376
Gas explosions in boiler furnaces. S. M. Quinn ... 316
Lighting pulverized coal safely in the New York Harbor ... *463
Obstructed explosion relief doors wreck boiler setting. C. O. Sandstrom ... 487
Yardsticks for wire rope safety ... *524

AIR COMPRESSORS

Cleaning compressed air ... *530
Filtered air for compressors and engines. *454
Inverted Venturi meter controls air supply. O. W. Lekstrom ... *486
Modernization of compressors and pumps 617
Moisture and its effect in air compressor cylinders. C. J. Mason ... 313
Operating compressors outdoors in cold weather. L. R. Brown ... *537

AIR CONDITIONING

Better heating, ventilating, air conditioning at lower cost ... 679
Birmingham department store air conditioning system ... *640
Discussion at meeting of A.S.M.E. and A.S.R.E. ... 697
Field broadens in offices, stores and restaurants ... *30
Hoover Dam concrete tests require air conditioning ... *69
Plant air conditioning from turbine ... 654
Radio City air conditioning includes some steam-jet refrigeration. Andre Merle ... *449
Refrigeration accelerated by air conditioning ... 31
Selling the weather (Ed.) ... 448
200 road to air comfort (Ed.) ... 284
Unit system cools Dallas store ... *132
Air density, chart for determining (Power's Data Sheets) ... 40
Air filters on compressors and engines ... *454
Air washer for Vernon diesels. F. B. Stubinger ... *593
Aluminum bromide "better than mercury" 172
Aluminum and power (World Power Conference) ... 353
American Boiler Mfgrs. Assn. — Pennsylvania meeting ... 388
American Institute of Electrical Engineers—Electron-type rectifiers featured at convention ... 101
American Society of Heating and Ventilating Engineers—Detroit meeting ... 354
Meeting discusses operation, design and research ... 102
American Society of Mechanical Engineers—Annual meeting ... 684
Chicago meeting — fuels, combustion, smoke, creep, turbine blades, diphenyl, condensers, power cycles, turbine moisture, pipe bends, boilers, x-rays, boiler water ... 340
New officers (picture feature) ... 683
Oil and gas power meeting ... 498
American Society of Refrigerating Engineers—Air conditioning discussed at meeting ... 698
Chicago meeting ... 349
American Welding Society—New York meeting ... 323

B

Bearings—Lighter oil may mean cooler bearings. J. I. Clower ... 70
Roller bearings recommended for large electric machines (World Power Conference) ... 353
Beer (Ed.) ... 58
Coal bills cut 60% by brewery power modernization. Ophuls & Stickney ... *59
1933 refrigeration for 1933 breweries. Ophuls & Stickney ... *118

BELTS — Page

Alignment charts solve flat belt problems. E. Cowan ... *587
Alignment chart for selecting flat belts (Ref. Bk. Sheets) ... 586
Cold glue used as belt cement. J. E. Noble ... 488
Flat belt drives cut power transmission costs ... *189
Flat belts link power service units ... *191
How wabble in belts can be stopped. Hoffman, Shore, Larson, Baldwin, Gooch, Baker, Noble ... 319
Idle leather-belt drives need inspection and maintenance ... 144
Increased the belt speed to increase its power. C. W. Peter ... *433
Power driven idlers for conveyor belt. W. E. Warner ... 88
Wabble stopped by increasing crown on pulleys. R. M. Emmons ... 487
Belts. See also Power transmission.
Binary cycle power generation, aluminum bromide for ... 172

BOILERS

Air in boiler drum causes drop in turbine vacuum. C. B. Hudson ... 44
Automatic combustion control operates baseload boiler at South Meadow plant. E. S. Bristol ... *468
Benson boiler to operate at all pressures ... 478
Blandin paper installs pulverized-coal-fired boiler to save money. A. J. Kull ... *414
Boiler pressure and gas temperature drop suddenly. G. Hoffman ... 649
Boiler room in Milwaukee Chair Co.—automatic draft fan control, ash pit light, stokers chart ... *366
Burning blocks to create boiler air space. G. F. Harden ... 314
Burning pulverized coal ... 694
Changing from coal to oil firing. Julsrud, Hudson, Pef, Rainey ... 436
Charting boiler operation saves coal. L. A. Corwin ... 409
Cincinnati Terminal served by modern boiler plant ... *186
Circulation plus separation ... 605
Coal bills cut 60% by brewery power modernization. Ophuls & Stickney ... *59
Coal handling equipment for small plant. H. V. Schiefer ... *628
Combination manual and automatic feed water regulation. L. W. Ross ... *376
Current research ... 249
Deslagging boiler tubes with water ... *141
Detecting oil in boiler. Domingo Mendoza ... 484
Diesel fired boilers ... *534
Difference in water temperature caused feed water regulator trouble. M. W. Shaffer ... *432
Double acting dollars for diesel fuel ... *285
Embrittlement. H. T. Horchkiss, Jr. ... 44
Embrittlement. F. G. Straub ... 592
European trends in boilers ... *35
Exhaust gas turbine supplements waste heat boiler. P. R. Sidler ... 650
Feed water valve leak caused water hammer. H. M. Spring ... *590
450-lb. industrial boilers ... *10
Free air is expensive. B. W. Wheeler ... *538
Furnace doors used for explosion relief. L. R. Baker ... 649
Gas explosions in boiler furnaces. S. M. Quinn ... 316
Gas fired boilers at Dallas give high heat rates. J. B. Nealey ... *410
Header patch put on 400-lb. boiler. W. R. Mills ... *466
How about blowdown? Johnston, Eckel, Spring, Coleman, Linn ... 595
How to burn cotton seed hulls. G. Hoffman ... *462
How to find excessive oil in steam engine exhaust. Miller, Larson, Bean, Kipper, Wadewith ... 272
How to reduce the fuel bill (chart) ... 674
Hudson Avenue station boilers ... *10
Hudson Avenue station cinder catcher. G. C. Cook ... *598
Idle boilers protected by ammonia gas. 653
Make soot blowing easy. C. G. Robinson ... *516
Making soot blowing easy. H. M. Spring, Jr. ... 649
Manual control for boiler damper. S. E. Nichols ... *650
Manual control for boiler damper. M. E. Wagner ... *539
Navy engineers propose new standard ship boiler compound (A.S.M.E. meeting) ... 687
New combustion chart. Eric Therkelsen *600: pt. 2 ... *652
"New deal" in boiler specifications. H. G. Lykken ... 521
90.3% boiler efficiency — 16 month average (Inter-national Harvester Co.) ... *112
Obstructed explosion relief doors wreck boiler setting. C. O. Sandstrom ... 487

Photo electric cell protects boilers. J. A. Murphy ... *647
Pitting of water heater ... 380
Preventing hard water leakage into boiler feedwater. W. R. Moore ... *207
Protection for idle boilers ... 210
Protection outside economizer blowdown line. H. M. Spring ... *484
Pulverized coal bypass improves boiler operation. H. M. Spring ... *537
Purdue's new mechanical laboratory ... *299
Safety valve connection fails on superheater header. W. E. Warner ... *377
Steam backs up into heater and causes high temperature. M. E. Wagner ... *647
Step by step modernization of steam generation ... 614
Submerged combustion for industrial heating. Kobe & Hauge ... *460
Submerged combustion practical? N. T. Pef ... 540
Swiss high pressure single tube boiler ... *97
Triangle Heating Plant installs boilers ... *543
Twin set boilers at Hell Gate. W. E. Caldwell ... *355
Velox boiler ... *37
Water purification and carry over at South Amboy Station. R. C. Roe ... *310

BOOK REVIEWS

Applied X-rays. G. L. Clark ... 156
A.S.H.V.E. guide 1933 ... 213
Dampfkraft. Friedrick Munzinger ... 597
Designing for arc welding, ed. by A. F. Davis ... 213
Diesel correspondence course ... 657
Direct- and alternating-currents. E. A. Loew ... 657
Electrons at work. C. R. Underhill ... 657
Elementary steam power engineering. Edgar MacNaughton ... 438
Elements of engineering thermodynamics. J. A. Moyer and others ... 495
Elements of industrial heat. Randall & Gillon ... 438
Elements of power generation. A. M. Greene ... 438
Engineering foundation arch dam investigation ... 547
Engineer's manual of English. Sypherd & Brown ... 383
Fuel valuegraph ... 597
Handbook of industrial temperature and humidity measurement and control. M. F. Behar ... 438
Handbook of mathematical tables and formulas. R. S. Burington ... 438
Heat transmission. W. H. McAdams ... 100
High speed diesel engines. A. W. Judge 213
Hydraulic machinery. D. W. Mead ... 213
Industrial heat transfer. Alfred Schack. 657
Internal-combustion engines, theory, analysis and design. Streeter & Lighty. 597
Internal combustion engines, theory and design. V. L. Maleev ... 547
Iron and steel. H. P. Tiemann ... 383
McGraw-Hill five place logarithmic and trigonometric tables R. D. Beetle ... 321
Mechanical world electrical pocket book. 213
Methods and procedure in federal purchasing. R. J. Montieth ... 547
Modern industrial organization. Herbert Von Beckerath ... 383
Number—the language of science. Tobias Dantzig ... 321
Ph and its practical applications. LaMotte, Kenny, and Reed ... 156
Power development of small streams. Harris & Rice ... 657
Power economy in the factory. J. C. Todman ... 49
Power plant engineering and design. F. T. Morse ... 49
Power plants on metal mines. F. A. Thomae ... 383
Principles and practice of electrical engineering. Alexander Gray ... 597
Procedure handbook of arc-welding design and practice ... 657
Recent social trends ... 49
Standard handbook for electrical engineers. F. F. Fowle ... 100
Standard specifications for metals and metal products ... 495
Standards yearbook, 1933 ... 321
Steam and gas engineering. T. E. Butterfield, etc. ... 657
Stop that smoke. Henry Obermeyer ... 383
Symmetrical components as applied to the analysis of unbalanced electrical circuits. C. F. Wagner ... 495
Technical data on fuel, ed. by Spires ... 49
Technical man sells his services. Edward Hurst ... 321
Technische messungen. A. Gramberg ... 495
Vibration prevention in engineering. A. L. Kimball ... 100
Vocational guidance in engineering lines. 495
What is technocracy? Allen Raymond ... 100
Brake adjustment ... *594
Business—"Big Bertha" (Ed.) ... 283
No more eggs (Ed.) ... 223

(*) Illustrated. (Ed.) Editorial.

C

Page

Carbon dioxide from flue gas. W. R. Kitzmiller *296
Carbon dioxide to protect Safe Harbor plant from fire. J. B. Cutler *367

CENTURY OF PROGRESS
Arcturus lights the Fair *361
Century's engineering progress *338
Diorama in "Electricity at Work" exhibit *340
Engineers have their day 350
Models of generating station and hydro plant *288
Papers and events of "Engineers' Week" *288
Chicago World's Fair. See Century of Progress.
Chimneys—Soot removal from chimney by water jets. M. O. Ross *42

COAL
Buying coal. L. R. Baker 434
Buying coal; interview by G. B. Gould. 232, 306
Coal handling equipment for small boiler plants. H. V. Schiefer *628
Coal handling system for small plant (University of North Carolina). I. W. Summerline *240
Coal in tanks (Ed.) 111
Code shuffles coal values; interview by G. B. Gould *641
How coal quality may change. T. J. Donnelly 484
More coal dollars (Ed.) 448
Power decreased 2 per cent, coal reduced 15 per cent at St. George Hotel 562
Prime Movers report compares methods of stoker coal supply 643
Selection of coal. G. B. Gould 593
60% less coal for 1933 beer. Ophuls & Stickney *59
Testing coal for buying; reply to Mr. Gould. N. T. Pef 467
What price coal? (Ed.) 504

CODES
Coal values shuffled by code; interview by G. B. Gould *641
National electrical code revised 663
Roosevelt signs 12 codes for power field 608
Spread eagle (Ed.) 558

COMBUSTION
Automatic combustion control operates base load boiler at South Meadow plant. E. S. Bristol *468
Buying coal; interview by G. B. Gould. 232, 306
Commercial burners for underwater fires. Kobe & Hauge *402
Current research 250
Diesel fuel problem as seen in Germany. Colmar Krause *94, correction 241
Fire under water (Ed.) 394
Flue gas heat losses when oil is the fuel. N. C. Ebaugh 128
Kent automatic combustion control system *202
Making the most of underfeed stokers. 518
New combustion insures speed—ease—accuracy. Eric Therkelsen *600 pt. 2 *652
Process evaporation by submerged combustion 7
Submerged combustion for industrial heating. Kobe & Hauge *460
Submerged combustion practical? N. T. Pef 540
Underfeed combustion with preheated air (Chicago meeting A.S.M.E.) 343

CONDENSERS
Performance of two 101,000 sq.ft. surface condensers. Landis & Tucker (Hudson Ave. Station) *308
Reduced water flow caused trash accumulation in condenser. H. M. Spring 648
Surface condenser design and operation (Chicago meeting A.S.M.E.) 344
Test methods for determining condenser cleanliness. Hardi & Cooper *154
Two stage condensing (Ed.) 394

CONTROL
Automatic combustion control operates base load boiler at South Meadow plant. E. S. Bristol *468
Automatic control valve for makeup boiler feed-water. F. Pollock *145
Centrifugal pumps made self priming by automatic devices *302
Coal handling system for small plant (University of North Carolina). I. W. Summerling *240
Combination manual and automatic feedwater regulation. L. W. Ross *376
Deepwater plant of Houston Lighting & Power Co.—Control system. E. H. Krieg *621
Direct-reading water-level indicator and alarm. H. M. Spring *43
Electric eye controls gas fired boilers .. *87
Flow meters control heating system at Chrysler Building. G. D. Turner 639
Instruments supervise control of steam turbines. R. B. Smith *142
Kent automatic combustion control system *202
Manual control for boiler damper. S. E. Nichols *650
Manual control for boiler damper. M. E. Wagner *539
Metering and control grows more centralized *28
Panama Canal uses supervisory power-system control 571
Photo electric cell protects boilers. J. A. Murphy *647
Pressure regulators. L. H. Brendel *422
Radio City's electric control and metering 572
Rate and quantity records transmitted over telephone circuits. C. G. Richardson *304
Reheat temperature automatically controlled at high pressure station. C. E. Steinbeck *72
Rockefeller Center elevators *395
Selecting motors for ventilating fan drives. C. P. Hamilton *406
Self priming pumps simplify automatic pumping *370
Taylor Instruments modernizes *292
Water measurement symposium (A.S.M.E. meeting) *688
Water wheel governing principles applied to Diesel engines *228

COOLING TOWERS
Camouflaged cooling towers. Radio City and Macy's (picture feature) 527
Facts and figures on cooling towers. G. J. Bischof *456
Macy's installs condensing turbine and cooling tower *225
Old stand pipe becomes cooling tower at Rockville Centre *173
Rockville Centre installs unique cooling tower *173
Corliss, George H., power engineer *197
Corrosion—tester developed by N.D.H.A. 350
Current research 251

COSTS AND PERFORMANCE
Baltimore Federal buildings run by purchased power. E. H. Thompson 200
British oil engine working costs 95
Building management? (Ed.) 558
Charting boiler operation saves coal. L. A. Corwin 409
Cheap power services in office buildings. L. E. Habben *582
Costs cut 2/3 at Deshler-Wallick Hotel .. *230
Costs and operation of McIndoes dam flashboards *570
Diesels cut power costs at Hudson River Stone plant *96
Double acting dollars for diesel fuel *285
Examples of balance in byproduct power plant design. M. K. Bryan *183
50 cents of every power dollar is wasted! *668
Heating system in Chrysler Building controlled by flow meters. G. D. Turner *639
How to make soot blowing easy. C. G. Robinson *516
How to reduce the fuel bill (chart) ... 674
How to save dollars with byproduct power. M. K. Bryan *66
Is the diesel engine more economical? .. 678
Modernization plan check sheet 620
90.3% boiler efficiency—16 month average (International Harvester Co.) *112
Operating data on Marshall, Minn., steam diesel plant. H. N. Anderson *635
Reducing peak loads cuts power costs. E. T. Moore *476
St. George Hotel power plant cuts its costs 562
St. James Bldg. cuts costs $8,000 per year *236
Saving power dollars 682
Saving power dollars—16 points 682
Saving water costs with cooling towers. G. J. Bischof *456
Scribner Press building halves fuel bill. *178
Steam savings vs. investment (Power's Data Sheets) 248
20 ways to cut power costs in plant distribution system *644

D

Dams. See Water Power.
Diphenyl presented at Chicago meeting, A.S.M.E. 344

E

EDISON ELECTRIC INSTITUTE
Replaces National Electric Light Assn... 106
Report on turbines 602

ELECTRICITY
Auxiliary transformers used for high potential testing. S. B. Stoughton *378
Brush maintenance. R. B. Glen *372
Buying electricity is an art. J. M. Acheson 76
Changes two motors and saves $2,400 per year. E. F. Carlsen 85
Changing induction motor speed 492
Changing a two phase motor for three phase operation 150
Code revised 663
Conductors spliced without injuring the insulation. Marin Phillips *269
Current research 252
Deepwater plant of Houston Lighting & Power Co. control system. E. H. Krieg. *621
Dual drives for steam plants. E. C. Dieffenbach 246
Dust on slip rings causes single phase operation. C. O. Von Dannenberg 485
Economical size for power conductors. F. C. DeWeese 434
Economies of generating electricity as by-product of district heating. Benjamin & Felgar *428
Effect of power factor on single phase wattmeter 318
Electric drive plus mechanical (Ed.) ... 504
Electric eye controls gas fired boilers .. *87
Electrical aids in the boiler room of Milwaukee Chair Co. *366
Electrical developments show improvements *26
Electron-type rectifiers featured at A.I.E.E. convention 101
Electronic rectifiers *136
Flashover troubles corrected on rotary converter commutator. T. E. Miller. *147
Flat spots on slip rings. Warner, Markland, Stuart, Balsley, Appleton, Baker, Noiles 46
Flat spots on slip rings. C. O. von Dannenberg 209
Fuses blown out by heat from lamp. H. M. Spring 270
Fuses blown when elevator motor is plugged 98
Fuses for 440 volt circuit 544
Generator alteration 544
Generators for Boulder Dam to be world's largest 608
Grounding practices. Friedman, Stinson, Markland, Emerson, Von Dannenberg, Glen, Nutter 545
Gyro-stabilizer for Conte di Savoia *83
Hoist for McIndoes dam flashboards .. *570
How wound rotor motors can be started With a compensator. Norman, Tucker, Stafford, Cotton, Molinett, Balsley, Olive 210
Insulation for conductors in damp conduits. J. E. Housley *41
Interchange bearing on motor to keep machine in service 206
Interchanging steam and electric power (A.S.M.E. meeting) 691
Kent automatic combustion control system *202
Lighting pulverized coal safely in the New Yorker *463
Low motor voltage 492
Lumens defined 544
Mercury arc rectifiers used for 250 volt D.C. supply. C. A. Butcher *322
Meters and handtools cut electrical maintenance costs 294
Minneapolis bank building builds its own electric plant 603
Modernizing electric power equipment .. 619
Motor protected by bimetallic snapper disk. James DeKiep *533
Motor speed increases 654
Motor test discloses single phase operation. J. E. Housley 86
Motor weds mechanical transmission .. *632
Motors for ventilating-fan drives. C. P. Hamilton *406
New switchboard in revamped Vermont marble plant *424
1932 production 162, 278
Panama Canal uses supervisory power system control 571
Parallel operation of rotary converters. 210
Paralleling an A.C. generator without synchronizing. G. P. Pearce 42
Paralleling A.C. generators without synchronizing. C. O. von Dannenberg .. 208
Photo-electric cell protects boilers. J. A. Murphy *647
Protecting magnetic circuits against induced voltages. M. D. Rogers *146
Protecting polyphase motors against single phase operation. H. Wilson 88
Pumping station motors at Chicago's Harrison St. station to set efficiency record 623
Radio City's electric control and metering *572
Rate of charging a storage battery 46
Rate and quantity records transmitted over telephone circuits. C. G. Richardson *304
Reducing peak loads cuts power costs. E. T. Moore *476
Retrieving high voltage lost in a circuit. David Williams *538
Rotor unbalance caused flat spots on slip rings. W. E. Warner 432
Selecting thermal relays to protect three phase motors. H. Wilson 78
Sensitive ground recorder for low voltage systems. Ellis Mills *485
Size of conductors for three phase motor load. Emerson, Plank, Ein, Von Dannenberg 320
Starting a wound rotor motor with rings shortened. R. F. Emerson 517
Starting wound rotor motors after a power interruption. C. O. Von Dannenberg 376
Stroboscope determines motor speed. W. L. Stevens *589
Substantial electrical installations reduce maintenance costs. Marin Phillips .*244
Synchronous motor operates with field switch open. S. Ein *85
20 ways to cut power costs in plant distribution system *644

(*) Illustrated. (Ed.) Editorial.

ENGINES—INTERNAL COMBUSTION

Boiler fuel for diesel. Hahn, Cloukey, Bender, Joyce, White, Long, Miller, Baker, Reynolds 654
British oil engine working costs 95
Butted piston rings cause engine trouble. J. S. Carpenter 147
Cast iron engines at English pumping station *127
Current research on diesel engines 259
Diesel at 1 Park Ave., N. Y. C. *38
Diesel compressor set *298
Diesels cut power costs at Hudson River Stone plant *96
Diesel engine at Vernon municipal station *39
Diesel engine manufacturers and suppliers 331, section 2, correction 351
Diesel engine more economical? 678
Diesel fired boilers *534
Diesel for submarines *83
Diesel foreign installations, section 2 335
Diesel fuel problems 94
Diesel fuel problem as seen in Germany. Colmar Krause *94, correction 243
Diesel generator set 318
Diesel installations, section 2, 332; correction 351
Diesel may knock because of fuel pump cams. Art Williamson 44
Diesel plant accessory equipment 336, section 2, correction 351
Diesel waste heat used to heat power plant (Municipal Power Plant, Bloomington, Ill.). Lloyd Howell *359
Diesel waste heat runs absorption plant. L. R. Baker 540
Diesels drive Yakima Park power plant. *526
Diesels in London flat hushed by leaf springs *237
Diesels on duty (Ed.) 284
Double acting dollars for diesel fuel *285
Engine piston installation simplified. Orville Adams *269
Erren engine. E. P. A. Heinze *490
Filter air at diesel engine inlets *454
Flexible diesel compressor refrigerating plant. Dasso, Godfrey, White, Dingwall, Rambreth, Bousum, Pendergrass 273
Four new uses for engine waste heat. Ludwig Lustig 651
Gas engine cranked by water turbine. J. S. Carpenter 315
Gas engines and compressors. W. L. Russell *195
Georgic marine diesel *82
German gas engine supplies electricity, steam and hot water *483
High pressure steam versus diesel for ship operation (World Power Conference) .. 353
High temperature steam distorts engine cylinder. J. Cassidy *648
How to get the most out of your packing. R. B. Purdy *624
Hydrogen engines for off-peak power utilization. E. P. A. Heinze *90
Increasing an engine's power by increasing its speed. S. M. Quinn .. 208
Michel diesel. E. O. A. Heinze *92
Most isolated power plant uses diesels (Mutual Chemical Co., New Caledonia, Australia) *461
Natural gas engine power instead of electric for compressors (Chicago meeting A.S.R.E.) 350
Oil and gas engines *16
Oil and gas for ice plant drives *234
Operating data on Marshall, Minn., steam-diesel plant. H. N. Anderson *635
Otto gas engine operates as diesel *425
Pistonless pump, exhaust pipe length for diesels (A.S.M.E. meeting) *695
Recent oil and gas engine installations. 653
Rockville Centre installs unique cooling tower *173
Steam diesel possibilities in the Boston Post Office. E. J. Kates 122
Two way crank simplifies taking of vertical indicator cards *432
Utilizing waste heat of gasoline engine. *646
Vernon, Cal., diesel plant 35,000 hp. .. *577
Washed air for Vernon diesels. F. B. Stubinger *593
Waste heat from gas engine used by pottery. James McIntosh 540
Waste heat recovery from a 135 hp. diesel. Golem, Weaver, Siegel, Martin, Bender, Baker 381
Waste heat utilization with diesels *419
Water wheel governing principles applied to Diesel engines *228
Welded—steel engines. Everett Chapman. *479
World's largest Diesel at Copenhagen .. *37

ENGINES—STEAM

Engine and exhaust turbine in one unit. *65
George H. Corliss, power engineer *197
How to find excessive oil in steam engine exhaust. Miller, Larson, Bean, Kipper, Wadewitz 272
Increasing the power of a steam engine. N. T. Pef 379
Is the diesel engine more economical? .. 678
Metering steam to reciprocating engines. G. Hoffman 647
Will increased pressure, even if throttled, cause engine trouble? Bender, Gerend, Solberg, McConnell, Strong, Griscom 594
Enthalpy—what is it? J. H. Pound, 134; C. H. Berry 271

EQUIPMENT—NEW

Air conditioner *275
Air cooling and conditioning unit *441
Air drying device *276
Air filter, aluminum *277
Ammeter, testing *105
Applicator, refractory *497
Battery, air cell 274
Bearings, molded non-metallic *384
Bearing, roller *105, *659
Belt, transmission *440
Belt, tread-surface leather *103
Belt, V *550
Belting, rubber, chemically resistant ... 50
Blower, portable electric *658
Blower and dust collector *658
Boiler, low headroom *440
Boiler, small, high pressure *439
Boiler feed unit *275
Breakers, circuit *325
Breaker with oil filled bushings 215b
